ABOUT ME

I'm a Front-End Developer from the Philippines. I enjoy developing clean, responsive websites that are easy to navigate and visually engaging. As an aspiring web developer, I continuously improve my skills in creating efficient, accessible, and user-centered digital experiences. 3rd year student at City College of Calamba

PROJECT

Inventory and Sales monitoring 2025– 2026

- Design, develop, and maintain enterprise web applications.
- Build scalable backend services and RESTful APIs.
- Collaborate with product managers, UI/UX designers, and QA engineers.
- Review code, mentor junior developers, and enforce coding standards.
- Optimize application performance, security, and scalability.

Coffee Shop Ordering System .
2024-2026

- Managed customer orders and ensured accurate order processing through the system.
- Handled menu management, including updating products, prices, and promotional items.
- Monitored inventory levels and tracked ingredient usage to prevent stock shortages.
- Generated sales reports and analyzed transaction records to support business decisions.
- Maintained customer order records and assisted in improving overall service efficiency.
